

### **REMARKS**

Applicant submits these amendments with simultaneous payment of the issue under 37 C.F.R § 1.312. The amendments correct minor informalities that, while not impacting the scope of the claims, are required for proper disclosure and protection of the invention. In particular, the specification and corresponding claims improperly recited “Dynamic Host Computer Protocol,” and have been corrected to: “Dynamic Host Configuration Protocol.” Likewise, “Real Time Transfer Protocol” has been corrected to “Real Time Transport Protocol”. No new matter is added. Although one of ordinary skill in the art would have understood that “Computer” and “Transfer” were common typographical errors, Applicant has corrected the errors to minimize potential confusion. The Abstract has been amended to correct typographical errors and better conform with the rest of the specification. In particular, the last sentence was removed for clarity purposes as it was technically inconsistent with the specification, for example, the first full paragraph on page 6 of the specification as originally filed.

Applicant acknowledges the Notice of Allowance mailed November 15, 2007, but respectfully disagrees with the scope of the stated reasons for allowance. Applicant respectfully submits that the teachings of the references have been overstated. Applicant further submits that while the reasons for allowance highlight certain patentable limitations of the claims, the claims contain multiple such limitations that are equally patentable.

Respectfully submitted,

John Baird
